FILTERS

Richfield provides quality filters systems for sterilizing and polishing filtration processes. An emphasis has been placed on the integrity of construction of the filter cartridges. The filter cartridge housing is just as important a part of any filtration system. Our filters are, chemically and mechanically compatible as per application and available in customized sizing and materials of construction. Our filters can be utilized in any applicable industry.

TECHNICAL

- No additional maintenance requirement
- High pressure capacity
- Easy release mechanisms
- Easy operations systems
- Off & On line mounting
- Available in required sizing
- SS, MS, CS etc material of constructions

STRAINERS

Richfield Strainers are widely used for fluids such as water, oil, air, and gas in applications including Oil Refining, Petrochemical Plants, Waterworks, Power Plants, Steel Manufacturing, Ship-building, Food Industries, Paper Manufacturing, and Synthetic Fibre creation.

Elements are the heart of each strainer. Therefore, critical properties such as corrosion resistance, filtration rate, element-body sealing, and structural strength are properly considered and designed for optimum application result.
